## USER'S GUIDE

HISTORICAL ABSTRACTS FIVE YEAR INDEX (Vols. 21-25) contains a Subject Profile Index (SPIndex) and an author index. In the subject index each entry provides a profile of an article, consisting of an average of 3.7 subject, geographic, and biographic descriptors, followed by the chronology of the article. The descriptors are rotated so that the complete profile is cited under each index term in alphabetical order.

The abstract numbers in this index volume refer to HISTORICAL ABSTRACTS, Part B, TWENTIETH CENTURY ABSTRACTS, vols. 21-25.

A dash replaces second and subsequent identical leading terms. Cross references in the form of *See* and *See also* references are provided.

The separate author index lists the names of authors and abstract numbers.

# SUBJECT INDEX

Subject Profile Index (SPIndex) carries both generic and specific index terms. Begin a search at the general term but also look under more specific or related terms. Cross-references also appear in this index.

Each string of index descriptors is intended to present a profile of a given article; however, no particular relationship between any two terms in the profile is implied. Terms within the profile are listed alphabetically after the leading term. The variety of punctuation and capitalization reflects production methods and has no intrinsic meaning; e.g., there is no difference in meaning between "History, study of" and "History (study of)."

Cities, towns, counties, and other small geographical subdivisions are normally listed in parentheses following their respective countries, e.g., "France (Paris)." However, certain regions of divided, disputed, changed, or indeterminate sovereignty do appear as leading terms listed alphabetically in the index, e.g., "Alsace-Lorraine," "Danzig (Free City 1919-39)," "Kashmir." Both "Great Britain" and "England" are indexed, the latter primarily when followed by geographical modifiers, e.g., "England (London)." The constituent republics of the USSR, e.g., "Ukraine," "Tadzhikistan," as well as its major regions, e.g., "Asia, Central," "Siberia," also appear as leading terms.

Terms beginning with an arabic numeral are listed after the letter Z. Chronology of a particular article appears at the end of the string of index descriptors. In the chronological descriptor, "c" stands for century, e.g., "19c" means "19th century."

All reference numbers are to abstracts in *HISTORICAL ABSTRACTS Part B: Twentieth Century Abstracts*, volumes 21-25.
